Trust	
Hillingdon Hospitals NHS Foundation Trust	
Hospital Name	
Hillingdon Hospital	
Description of Unit	
<p>Hillingdon Hospital is a District General Hospital.</p> <p>Our gynaecology service investigates, diagnoses and treats conditions related to women's reproductive health. The main gynaecology outpatients and specialist clinics and emergency and inpatient services are located at the Hillingdon hospital site. The outpatient and specialist clinics are provided on Cumberledge Unit on the 3rd floor in the main building. We also provide gynaecology outpatients at Mount Vernon Hospital and at an outreach clinic in Buckinghamshire.</p> <p>We offer a consultant-led emergency gynaecology service and have a 9-bedded dedicated female only gynaecology ward.</p> <p>We offer, rapid access (2 week waits) for urgent gynaecological conditions/suspected cancer, and minimal access surgery for gynaecology. We perform over 1000 outpatient day case procedures each year, reducing time spent in hospital and allowing patients to recover comfortably at home. Treatment of polyps, removal of lost IUCDs, is routinely offered and the service is now developing to offer further outpatient procedures.</p>
